L5 ANSWER 1 OF 1 USPATFULL on STN

TI Chlorofluorocarbon-free mometasone furoate aerosol formulations

AB The invention relates to suspension aerosol formulations which exhibit stable particle sizes, containing mometasone furoate, about 1 to about 10 weight percent ethanol and 1,1,1,2,3,3,3-Heptafluoropropane as the propellant. A surfactant, such as oleic acid, can also be included. These formulations are suitable for use in metered dose inhalers.

ACCESSION NUMBER: 2000:67423 USPATFULL

TITLE: Chlorofluorocarbon-free mometasone furoate aerosol formulations
